

# Pathways to Corporate Consciousness

- Insights into Theory U
- Leading from the future as it emerges

Come and experience our one day highly interactive workshop, designed to make sense of, and bring the latest in emergence theories 'to life'. By participating in this workshop you will learn practical, feasible and workable methods of emergence to apply to & re-invent your leadership, coaching, consulting or healing practice.

## What is Presencing and what is Theory U?

"Presencing," a blend of the words "presence" and "sensing," refers to the ability to sense and bring into the present one's highest future potential—as an individual and as a group. Theory U offers both a new theoretical perspective and a practical social technology. As a theoretical perspective, Theory U suggests that the way in which we attend to a situation determines how a situation unfolds: *I attend this way, therefore it emerges that way.* " From The Presencing Institute in defining Presencing and Theory U.

## Your Facilitators

### Claire Jankelson

Claire brings a passion for educating that promotes understanding and brings results. With over a decade of teaching in a range of major tertiary educational institutes and consulting to organisations in various research and facilitation capacities, she is also in private practise for coaching and leadership. Confluent Leadership, developed through the course of her PhD, is a consciousness model of leadership. This experience based approach to leadership is accessible, enjoyable and profound.

### Janet Sernack

Janet is deeply committed to enabling leaders to embody the qualities of authentic global leadership. She is a 'wisdom worker' who is accessing and assimilating her soul wisdom with her thirty years of experience as a corporate executive, business consultant, corporate trainer and leadership educator, facilitator and executive coach. Janet completed the 'Leadership for Profound Innovation and Change' workshop facilitated by Otto Scharmer, from MIT, in Boston, Massachusetts, USA in 2006. Since then she has collaborated with others to evolve the Presencing concept utilising the 'Theory U' to raise the levels of consciousness in organisations
